

Our Power

Team work made up of: people, tooling, equipment, skills and passion. Service, competitiveness, quality and flexibility make us the best solution to solve your issues.

Logistic & Production

The performance on delivery is guaranteed by an integrated automated information system with a highly flexible production.

24 hours service available to support every type of requirements.

Pressbolt Middle East boost its sales on a worldwide scale focusing its attention particularly towards Middle East, Africa, and Asian markets.

Know-How & Experience

Our experience and know-how are at your disposal aiming to help our customers in every circumstance to make the best choice regarding materials, coatings, type of products and heat treatment.

Customer Care

Dedicated staff is ready to comply with all customers' requirements.

Pressbolt is also a service company. According to customers' requirements and needs we can organize:

- ✓ Dedicated stock inside our/your facility
- ✓ Kit realizations
- ✓ Consignment stock in accordance to a specific contract agreement
- ✓ Special packaging
- ✓ Service in your facility
- ✓ Colour coding identification
- ✓ Long life protections

Our Profile

Since 2009, Pressbolt Middle East has been a market leader as supplier of fasteners, gaskets, special coatings, and precision machined components to the energy sector across Middle East.

The demand expressed by a competitive regional market, combined with PRESSBOLT's objective to expand, and become an important market player, have guaranteed a constant growth rate in the region.

A spirit of innovation, the company's constant strives to enhance its know-how, together with the use of new technologies, materials, the development of quality high-performing processes and a vocation for customer service, assure PRESSBOLT the necessary leadership to satisfy market requirements.

Our Stock

We are able to offer to the customers a wide range of 85,000 items immediately available from our stock of over 10,000 sqm, along with more than 8,000 tons of raw materials.

A tangible global resource for addressing world markets on a day-to-day basis. Our quality control department monitors and inspects materials from their receipt to delivery.

All materials are certified by primary certification bodies and in-house tests are carried out by Pressbolt at its laboratory or third-party lab as per client requirement.

We are always able to maintain a wide margin of flexibility and responsiveness to our customers' requests or market trends.

Materials

- ASTM A193
- B5, B6, B6, B7, B7M, B16,
- CLASS 1: B8, B8C, B8M, B8P, B8T, B8LN, B8MLN
- CLASS 1A: B8A, B8CA, B8MA, B8PA, B8TA, B8LNA, B8MLNA, B8NA, B8MNA, B8MLCUNA
- CLASS 1B: B8N, B8MN, B8MLCUN
- CLASS 1C: B8R, B8RA, B8S, B8SA
- CLASS 1D: B8, B8M, B8P, B8LN, B8MLN, B8N, B8MN, B8R B8S
- CLASS 2: B8, B8C, B8P, B8T, B8N, B8M, B8MN, B8MLCUN
- CLASS 2B: B8M2, B8
- CLASS 2C: B8M3
- ASTM A320
- L7, L7M, L43
- Classe 1: B8, B8C, B8M, B8P, B8F, B8T, B8LN, B8MLN
- Classe 1A: B8A, B8CA, B8MA, B8PA, B8FA, B8TA, B8LNA, B8MLN
- Classe 2: B8, B8C, B8P, B8F, B8T

Quality Assurance

Pressbolt Middle East offers premium products at competitive rates, understanding that obtaining the best possible value at the lowest possible cost is crucial. We pledge to create superior items with the sole goal of satisfying our customers.

In manufacturing, quality control refers to the different processes that producers use to guarantee that their goods fulfill predefined operational, safety, and quality criteria. In essence, it serves as the production process' policing body, keeping an eye out for problems from the choice of materials to the delivery of the finished product. Following these guidelines helps manufacturers maintain their good name, cut down on waste from errors or reworks, and ultimately save time and money.

Apart from obtaining quality approvals from numerous prominent worldwide certification agencies, Pressbolt also holds EN ISO 9001:2015 certification. This certification guarantees consistent quality control that is upheld at every production stage. Our internal laboratory performs inspections at the required stages, starting on the incoming raw materials up to the final products. On request, inspections and tests are carried out by third party certified bodies (Agencies such as Lloyd Register, T.U.V., Bureau Veritas, I.S.P.E.S.L., in internal laboratory issued as ISO 17025 Certified Laboratory. Our sole goal is to satisfy our customers by producing high-quality items.

Main Products

- Standard fasteners
- Precision bolting
- API bolting
- OEM CNC parts

Standards

ASTM-ASME-BS-DIN-UNI-EN
API-ISO-NORSOK

Dimensional Range

from 1/4" (M6) up to 8" (M180)
ISO-UNC-UNS-UNF

Heat treatments

- Quenching and tempering
- Carbide solution treatment
- Age hardening
- Stress relief
- Annealing/Solution Annealing

Certifications

EN 10204 2.1/2.2/3.1/3.2

Coatings

- Electro zinc plating
- Phosphate plating
- Electroless nickel plating (ENP)
- Zinc nickel plating
- Silver plating
- Hot dip galvanizing
- PTFE coating
- Aluminium coating
- Ceramic coating
- Zinc flake coating
- TAKE 1000 / TAKECOAT CERAMIC 1

Laboratory Test

- Visual Examination
- Dimensional Examination
- Dry Film Thickness Test
- Spectro Analysis Examination
- Positive Material Identification
- Mechanical tests

(TENSILE, IMPACT, HARDNESS, AND PROOF LOAD TEST)

- Creep and Stress Rupture Test
- Metallographic Test
- Ultrasonic Examination
- Magnetic Particle Examination
- Salt Spray Corrosion Test
- Liquid Penetrant Test
- Intergranular Corrosion Test

HOMOLOGATIONS CERTIFIED BY A CERTIFIED BODY

- ISO 9001:2015
- API 20E/20F
- PED 97/23/EC ANNEX I PART 4,3 (Pressure equipment directive 97/23/EC)
- NORSOK 650
